ABOUT YEEZE

Ningbo Yeeze Commodities Co., Ltd is located in Yinzhou District, Ningbo city, east of China, and is very close to Ningbo port, which is one of the main exporting ports in China. The factory occupies a production area of over 40,000 square meters, with 6 modern production lines and over 350 well-trained experienced workers. Yeeze has certifications of BSCI, Sedex, Scan and ISO9001, and can also offer product test reports issued by laboratories who have ISO17025 certifications.

Although relatively newly founded in 2017, Yeeze is a qualified supplier of high-end outdoor umbrellas with over 25 years of design and production experience in European and North American markets. We have a one-stop buying process designed to offer our customers easily access to a wide range of outdoor shading products such as Cantilever, Market umbrellas, Heavy-duty umbrellas, as well as Shade sails, Furniture protection covers, and Bases, applicable to both home use and commercial use.

As a professional manufacturer of outdoor umbrellas, we're focusing on creating truly unique pieces of durable umbrellas, by scientific and humanized design, high-quality materials, traditional craftsmanship and modern manufacturing techniques.

PERFECT COMBINATION OF DESIGN AND QUALITY

In line with the principle of the perfect combination of design and quality, as well as the industry's rich design and production experience, we achieve a perfect balance between quality and cost, in which product design is not exaggerated and plagiarized. We provide customers with in-depth customized services, and jointly develop with customers to achieve proprietary design and market monopoly, and ultimately achieve long-term cooperation and a win-win situation.

INDUSTRIAL BASE ADVANTAGE

We are located in Ningbo city, the famous mold base of China. With the advantages of the mold industry, we can get a professional and excellent mold for die-casting and plastic accessories, which are two main important parts of the umbrella, for example, the internal parts of the crank, zinc tilt of the market umbrella, which always determine the quality of the entire umbrella, as mold quality will not only affect the strength, but also effect the precision. Thus with good quality of die-casting parts and plastic parts, we can provide precise, steady, durable and cost-effective products for all our customers.

We are also close to Tangxi town, the famous “hardware town” of the industry. The hardware of the umbrella also takes an important role, especially we use all stainless steel hardware. We have many choices in this “Hardware Town” with good price and good quality. That’s why we can offer 100% rust-resistant umbrellas.

TESTING LAB

We deeply understand the importance of customer requirements for exact tolerance and precision processing quality for every part of the umbrella. So we invest and built up our own lab with big and small machines for different kinds of tests, for example, fabric running machine for defect checking, salt-spraying test for stainless steel screws, side strength and pressure test for carton box. For fabric, we do humidity test, water pressure test, and tearing test besides the color and basic weight checking. Our R&D and quality control team not only use our own equipment and tools, but also cooperate with well-know professional testing companies to meet special testing needs of our customers, for example, the wind testing for the strength of the whole umbrella.

CUSTOMERS

As a professional manufacturer of the outdoor umbrella, we are capable to cooperate with different kinds of customers and full fill all their requirements. We have enough production capacity for orders from super market or wholesaler, and we’re also able to develop new designs for specialty stores. Benefit from 20 years of design and production experience, we know what high-end and high quality really means, especially for commercial use at the hotel, restaurant and resort. It will be your most wise choice to start umbrella business with Yeeze.

DEEP CUSTOMIZATION

Based on over 20 years of design and production experience from cooperating with high-end brands in European and North American market, we are able to offer more special deep customization service to our customers. With customers’ new product briefs, ideal concepts, or appearance designs, we can turn them out to be new umbrellas fulfilled with practical functions, nice details and high quality. Regarding this kind of joint development, we can also offer customer exclusive selling in their markets. We aim to be customers’ partners on outdoor umbrellas, and set up deep cooperation and development with customers for the better win-win future.

PROFESSIONAL AND EFFICIENCY SERVICE

Service is not only our core competency but the company's greatest strength. We ensure our customers have scientific designs, qualified raw materials, reasonable prices, good products, on-time shipment and customs clearance, and efficient after-sales service. Our goal is to make the purchase and delivery process as easy and convenient to customers as possible. We have great working relationships with air and sea transportation companies and can arrange shipping and customs clearance for your products efficiently. We handle everything from this end and allow you to concentrate on marketing the products.

APPLICATIONS

FOR HOTELS AND RESTAURANTS

Umbrellas for commercial use always require more strength, stability, function and design. We knows exactly these requirements and can always satisfy customers with superior performance on these terms. Besides the technical, functional, and humane design, we only uses high-quality materials, including thick aluminum tubes, real 304 stainless steel, precise mechanism accessories, as well as luxury acrylic fabrics. All of these contribute to the robust resistant umbrellas which can stand up to wind speeds of max. 90km/h without a problem.

FOR GARDENS

We spend over 90% of each day indoors. From our homes to our offices and the commutes in between, it seems like we’ve forgotten what it’s like to spend quality time in the garden.

Setting up Yeeze umbrella in the garden is icing on the cake for summer enjoyment. With stable construction, multiple functions and high quality materials, Yeeze umbrella is weather resistant and guarantees a long life span. What’s more, with a wide range of patterns and colors, Yeeze umbrella can always be matched to different styles of gardens. Besides plenty of color options, Yeeze cover fabrics offer excellent UV protection during the enjoyment.

FOR THE PATIO / TERRACE

As an indispensable extension of the living room, the patio/terrace are worth to be set up with high-quality umbrellas. Due to the robust construction and high-quality fabric, Yeeze umbrella offer optimum protection again the sun and rain, and can stand up to the wind conditions on the coast and on mountains. As a professional manufacturer for the outdoor umbrella, Yeeze offer umbrellas at full range of size to suit for different patio/terrace space. No matter needed by side of swimming pool, or to matching for 6-pc or 8-pc furniture set, Yeeze can all work it out, with different patterns of the umbrella, as well as proper base solutions.

FOR THE BALCONY

Balcony is kind of important but small space of the house. With Yeeze umbrella at customized dimensions, small balcony can also easily play their roles. Combining with tilt function, people can get perfect sun protection at any time of the day.

KANI PRO

The Stylish Cantilever

With square pole and square crank, this cantilever brings you kind of special and stylish feeling. The standing pole is 75 x 100 cm. With all cast aluminum hubs, this umbrella frame can hold bigger size steadily and can stand up to 50 km/h wind speed.

This umbrella is also multifunctional, with all functions that a cantilever should have. And the 360g rotation function has a different operation way from Meeru.

Function	360 degree rotation
	Flexible ribs ends keeping fabric tight all the time
Application Area	Hotel Restaurant Pool
LED	Not available
	Can add magnetic central lamp
Accessory	Protection cover included
Base Solutions	Steel base / plastic base / granite base / ground anchor

GARDA

The Commercial Cantilever

Garda combines two outdoor umbrellas of 300 x 300 cm and they together can provide 18 m² of shade. It's easy to open and close with gas-assisted, instead of cables which make you worry about the broken and replacement. Each roof can be opened, closed and tilted in height individually. And due to the one-pole design, the space underneath can be used optimally which makes this sunshade ideal for HoReCa projects.

MITRE

The Heavy-duty Cantilever

This huge umbrella is the top-level cantilever. Its standing pole is 80 x 120 cm, and with ribs 20 x 30 mm. This robust frame can hold big size up to 4 x 4 M. It can survive in tough weather, like windy countries with up to 60 km/h wind. Matching with 5-year warranty fabric, this umbrella is the best choice for commercial applications.

HAKURA

The Heavy-Duty Umbrella

This heavy-duty umbrella is designed for restaurant, hotels and all other outdoor commercial plazas. Its pole is Dia.100 mm with stripe. All stainless steel screw connection make it easy to replace the canopy and other spare parts. Thanks to the technical design and telescopic system, such heavy-duty umbrella is still very easy operating and no disturb on the furniture when closing. With wind resistant up to 80 km/h, this umbrella is far stronger than what actually need, which at the same time means its durability and long life span.

COCO A

The Easiest Umbrella

This push up umbrella is nicely designed for small places, like balcony and cafe shop by road side. Its reverse construction make it really easy operating. All what you need to do is just push up, and it will be fixed by itself, even without a lock. What's more, the soft handle make you feel comfortable, just like sitting underneath and enjoying a short break. Its solid one-piece-pole Dia.38 mm is really steady and strong enough to stand up to Grade 8 wind in Summer.

BAROS-AD

The Umbrella for Advertisement

To make the advertisement on the canopy more obvious for the passerby, the roof surface is designed to be more inclined than normal umbrellas. Together with the strong central pole dia.50.8mm and 16x28mm ribs, Baros-ad is durable and robust enough for commercial use for HoReCa projects.

BASE SOLUTION

The outdoor umbrella also requires the right base solution. It will vary according to different application environments and different umbrella types. YEEZE offers various base solutions. Basically, there are three types of umbrella bases:

Free-standing Base:

Does your umbrella remain in the same place most of the time and does not obstruct any walkways? If so, we recommend using a free-standing base. Bases come in different dimensions, weights and materials.

- Steel base frame, weighted by granite pavers, with aluminum cover as an option
- Steel plate base, from small weight 25KG to 200KG
- Plastic base with water/sand filling
- Nature granite stone base

Mobile base solution:

Do you want to be able to adapt your umbrella to the position of the sun? If so, what you need is a base with wheels. We have steel and stainless steel Wheels, both are strong enough to support up to 200KG base.

Ground anchors:

Does the umbrella have a fixed place on a terrace that never changes? If so, we recommend that you use a ground anchor firmly in concrete, so that the base doesn't stick up and become a tripping hazard. For cafés and restaurants in particular, this type of fixation is very useful. Guests and waiting staff can move around freely underneath the umbrellas and between tables without a base getting in the way. It's first choice for HoReCa projects.

STEEL BASE FRAME WITH GRANITE PAVERS

Steel base frame is quite flexible for customers to organize according to their favorite. It can be weighted by concrete pavers, or granite pavers, or other tiles that are available at local stores. And the aluminum cover make the base looks cleaner and more elegant. We offer different heights to hold different paver layers to reach weight from 130KG to 200KG. Heavy weight is still able to be easy-moving with stainless steel wheels.

Fabric Solution

A good horse with a good saddle, a good umbrella with a good canopy. Canopy is always an important part of outdoor umbrellas. Color of the canopy is a good eye-catcher to level up the scene of the outdoor area. The high quality of the canopy can offer good UV protection, while the weather resistant can guarantee long life span.

Yeeze can satisfy customers with different kinds of fabrics, including polyester, Olefin and Acrylic, both from local and imported. For local fabrics, Yeeze created its own fabric brand YEETEX to ensure the quality. For imported fabric, Yeeze can import from US, France, Spain and Indonesia etc, refering to the brands like Sunbrella, Recasens, Sunproof etc. Yeeze is willing and able to meet customers requirement on fabric suppliers.

According to different quality performance on the color fastness, UV protection, material strength, and aging resistance, YEETEX divide these fabrics into four classes: "Affordable", "Environmental", and "Professional". The division into substance classes does not represent a pure evaluation. Rather, they indicate the extent to which the characteristics of the substances are pronounced. This form can't tell the difference hand feelings, which can only find out with real fabric swatches in hand.

(Please view the diagram on the next page).

Yeeze umbrellas are with robust and stable construction, multiple functions, technical design, and humanity details, all of which means Yeeze umbrellas deserve good acrylic as canopy fabric - fabric classes 3. The acrylic fabrics have a high level of UV protection and excellent color fastness with a considerable period of fading, which means that umbrella owners can look forward to the new from summer to summer.

Fabric class 1 and 1+ are ideal for those who are budget-conscious and who have slightly lower demands on color fastness. Fabric class 2 is a perfect green choice for environmental consideration.

Class 3 YEETEX Acrylic

YEETEX Acrylic is 100% solution dyed. The stock solution coloring technology enables the color to be evenly distributed in the fibers leading to a high color fastness to sunlight. After 2000 hours of exposure to sunlight, it can keep bright colors like new.

The aging resistance of acrylic fiber is many times stronger and longer lasting than Polyester and Olefin, making it more suitable for outdoor umbrellas.

With a weight of 260g, it provides UV80 protection (According to UV standing 801). Additionally, we have over 20 colors in stock and have no minimum order quantity requirement.

All of these advantages making YEETEX acrylic the most popular fabric choice for outdoor umbrellas.

A leader in its field for more than 60 years, the American **Sunbrella®** brand brings together performance and design to produce sophisticated fabrics for indoor and outdoor use.

A global leader in the creation of innovative fabrics for marine and sailing activities, the brand is also an expert in the upholstery fabrics sector.

Skilfully combining performance, design and creativity, **Sunbrella®** develops top-quality contemporary collections, and continuously transforms and reinvents its products to meet the needs of its discerning customers. Building on its unique weaving and yarn-dyeing expertise, the brand has developed a technical process that makes it stand out from the competition.

Sunbrella® believes fabrics should be stylish and practical and has cemented its position as a leading manufacturer of high-performance textiles.

Sunbrella fabrics are designed and manufactured by Dickson Constant in northern France.

Frame Treatment

Frame treatment is an indispensable important step to ensure the quality of the umbrella, as well as the elegant appearance. Yeeze can do four treatments: powder coating, matt anodizing, shinny anodizing and heat transfer wooden looking.

Powder Coating

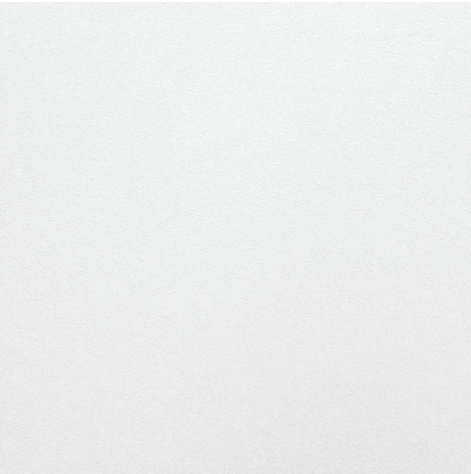

It is most popular treatment for the frames. Beside environmental standard, the powder Yeeze used is with glitter metal powder which makes the appearance more high-end. And Yeeze do the powder coating with slightly metal powder for better hand feeling.

BROWN 0S

BLACK 9S

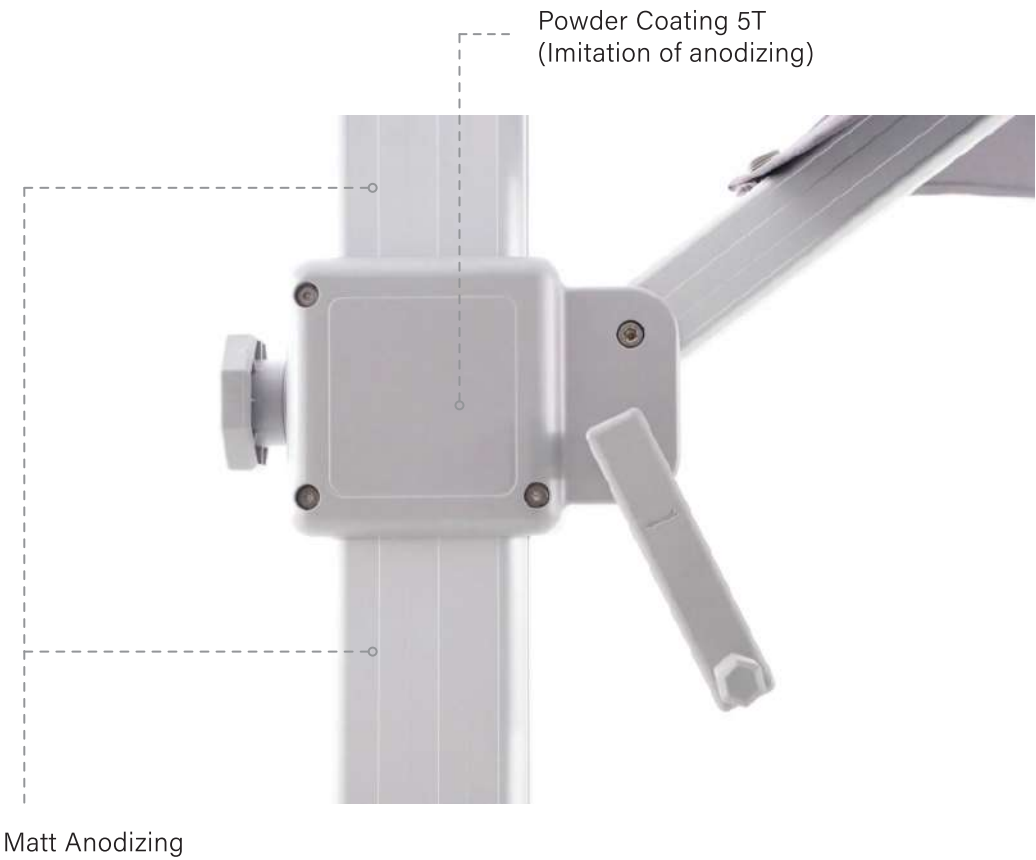

WHITE 3S

GREY 6S

Anodizing

It is a treatment directly applied to the aluminum itself. It's most high-end appearance and it is more durable for application in salty environment, e.g pool, beach. There're matt anodizing and shinning anodizing.

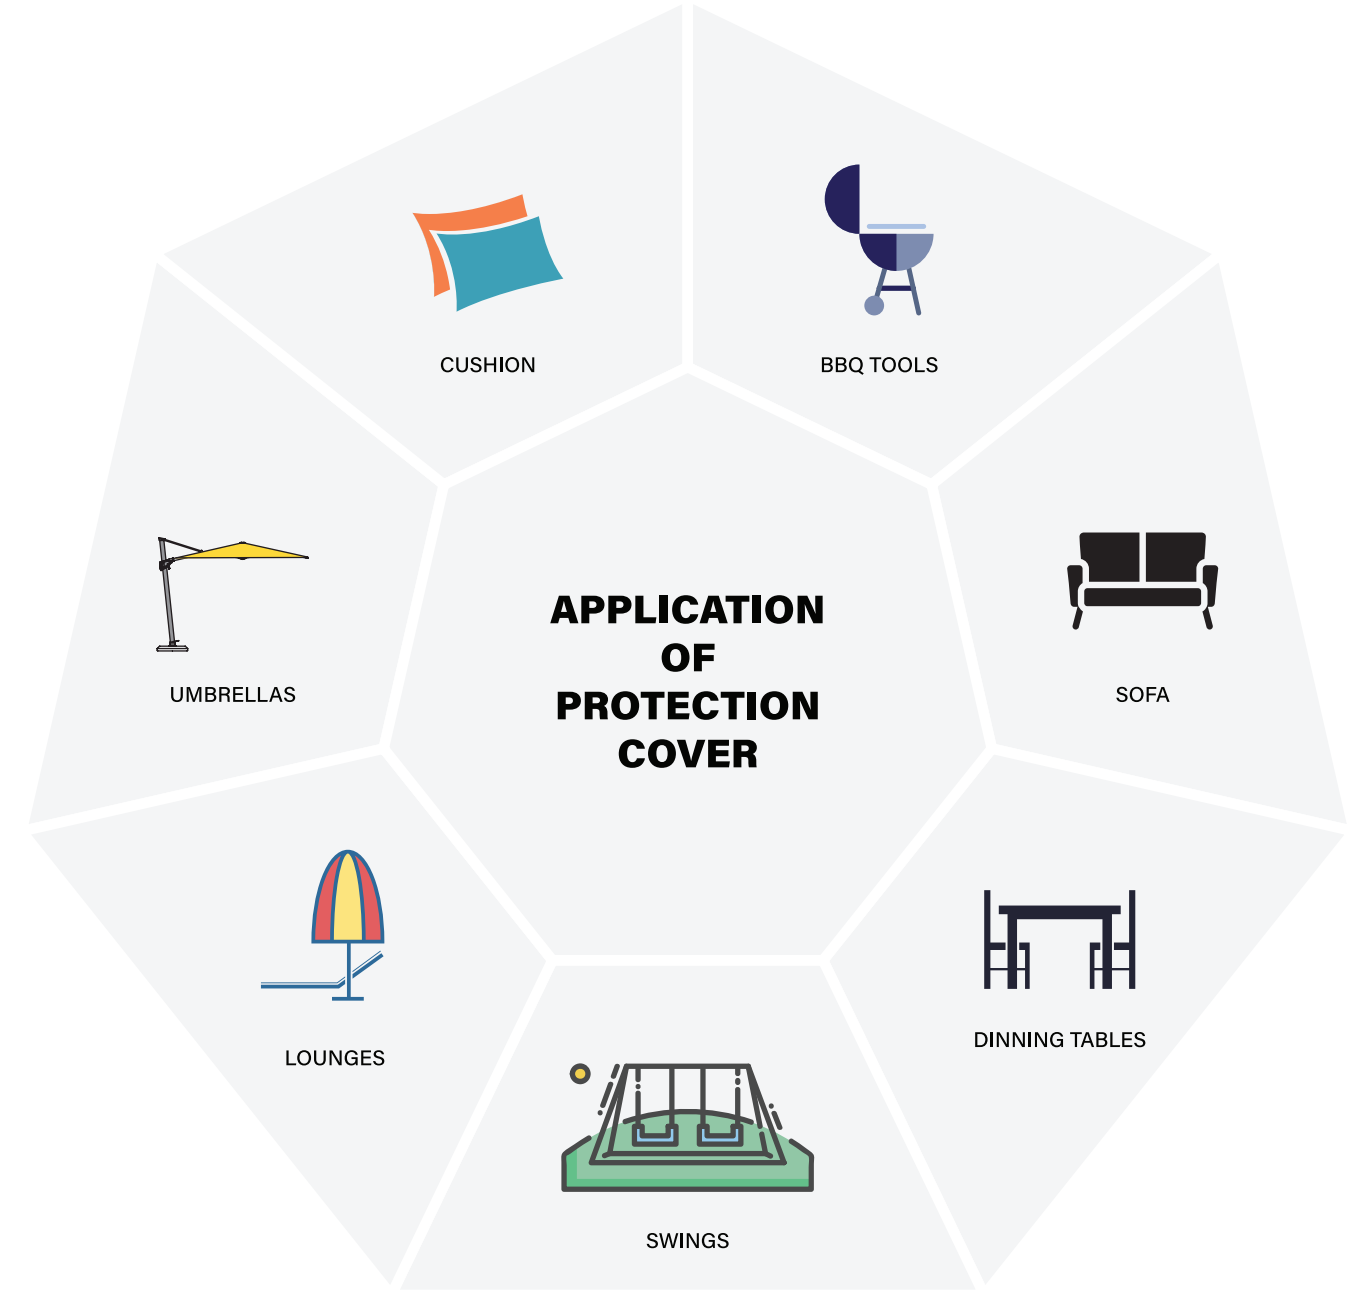

Heat-Transfer Wooden Looking

It is a special treatment to appy the wooden looking onto the tube surface, which make the tube similar to the wooden appearance.

Protective Cover

As an important accessory of outdoor umbrellas and furniture, we pay much attention to the details of the protective cover. The fabric must be weather-resistant, fade-resistant as well as water-resistant. What's more, our protective feature ventilation holes to allow air flow and prevent mold growth. Don't need the cover in the summer? Each cover features a convenient built-in storage pouch to keep the covers safe, secure, and out of the way.

Customization and Advertisement

As an experienced outdoor umbrella manufacturer, if you need umbrellas for HoReCa projects, we can also provide you with advertising customization services on the top canopy. We can do on frame tube as well as on the fabric.

Laser Engraving

We have Laser engraving machines to create visible logos on the aluminum tube surface, no matter the tube surface is powder coated, or anodized, or heat-transfer wooden looking treated. And the logo size can be as large as 15cm wide.

Silk Screen Printing

On the canopy, we use silk screen print to customize those designs in solid colors and logo size can reach to 60cm wide.

Dye-sublimation Printing

Once you need full printing the canopy, or to print designs in gradient colors, we recommend dye-sublimation printing, which is environmental friendly. It has no limited by size, and comparing to silk screen printing, it performs better on weather resistance, rubbing resistance, and folding resistance. It's suitable for all kinds of outdoor weather.

Where there is sun, there is YEEZE SHADE

Yeeze is a high-end outdoor umbrella company with 25 years of experience in designing and manufacturing functional and strong umbrellas.

All over the world our mission is the same - Develop and Co-develop high quality and beautiful Outdoor umbrellas that help customers expand their outdoor business.
